

DISCHARGE DAMPENERS

Gas Charged and Maintenance Free

Customization Options:

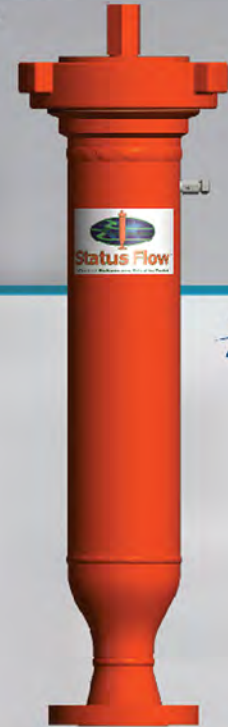

- Standard from 5,000 -15,000 psi with higher pressures available
- Custom inlet/outlet connections and nozzle arrangements
- High temp and corrosion resistant materials available
- Vent and drain options

PD Series

DR Series

Status Flow Series

Gas Charged

- Cost effective
- Proven performance
- Compact, lightweight design
- Top repairable/servicable
- Interchangeable with competitor product parts
- High pre-charge
- Wide range of volume & pressure capabilities

Maintenance Free

- Best return value
- Reactive design
- Consistent performance with long service life
- Perfect for offshore or remote locations
- Customizable to achieve optimal levels of pulsation control

Gas Charged

- Small/lightweight - easy install
- Great performance in an affordable & durable package
- Top repairable/servicable
- Flow through style available

WHY PULSATION CONTROL?

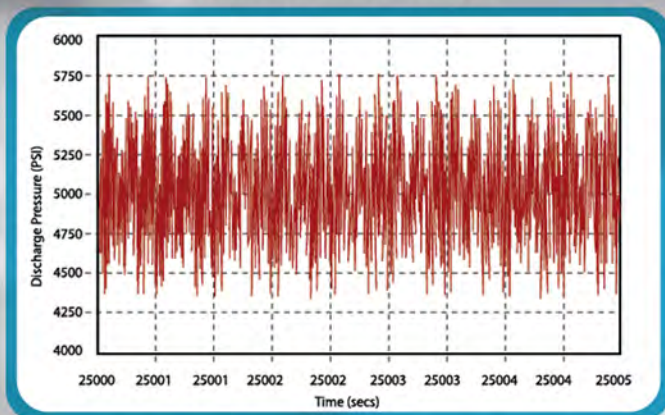

Pump and piping system vibrations lead to premature equipment failure and unsafe conditions. Protect your system with a custom designed solution that will:

- Dampen high and low frequency pulsation energies
- Maintain required pressure and flow profiles
- Increase pump and fluid-end life
- Improve pump safety and piping system protection
- Decrease system operating costs and downtime
- Provide consistent performance and best return value

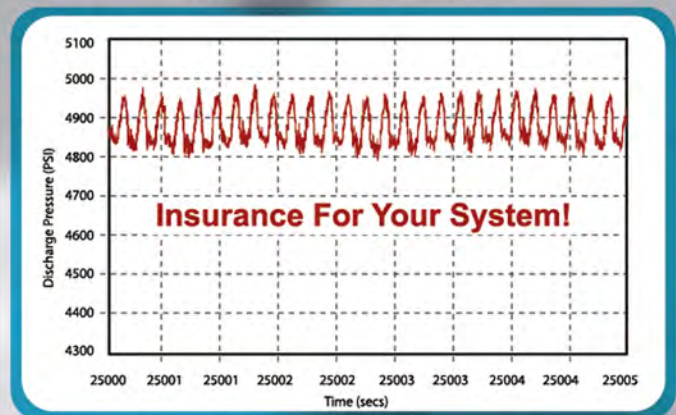

PERFORMANCE BENEFITS

Without Dampener
Pressure Variation - 1350 psi

Extreme Pressure Variation
*Potentially violent and unsafe
piping system vibration*

With Dampener
Pressure Variation - 175 psi

Dramatic Improvement
*Prolong pump life and
maximize efficiency*

Performance Pulsation Control

...specializes in the engineering, design and manufacture of Pulsation Control Devices. Our expert engineers provide custom solutions for Oil & Gas, Well Service, Chemical Plant, Refinery, Water Treatment and a variety of Industrial Applications. When you call us for Pulsation Control, you can count on a worry-free customer experience from start to finish with fast delivery. Pulsation Control is all we do!
